Interfaith Power & Light

honors

National Grid

with our "Greener Grid" Award. Recently, National Grid's "Green Up" program made it possible for their residential electric customers to invest in renewable electricity directly through their utility bills. The vast majority of power plants that feed into the electrical grid burn non-renewable fossil fuels such as coal, oil, and gas and cause a great deal of pollution, impacting the health and safety of those who live near them. NGRID's "Green Up" program encourages the growth of renewable, clean electric sources – thereby decreasing our dependence on fossil fuel-burning power plants – and is one important step toward environmental justice. Thank you, NGRID, for helping the renewable energy industry to grow.

Thomas E. Nutt-Powell
Co-Founder and President

Stephen B. MacAusland
Co-Founder and Treasurer

Signed on this Seventeenth day of November 2003.
